**SHARP**  
Be Original.

# Manage your business, not your PCs.

Sharp can take care of your PC requirements across their entire lifetime, with value added services and an affordable payment plan.

Businesses these days need to focus their time and resources where they add the most value – to both the business and its customers. Outdated and inefficiently managed technology can be a real distraction and significantly impede productivity and profitability.

Sharp PC as a Service (PCaaS) provides businesses with affordable and secure managed laptop services. It takes away the hassle and many of the overheads associated with buying PCs and managing them in-house. So you can enjoy peace of mind that your PCs security is monitored 24/7, costs are manageable and technology is regularly refreshed. And your staff are free to focus on driving your business forward.

## Simply more predictable

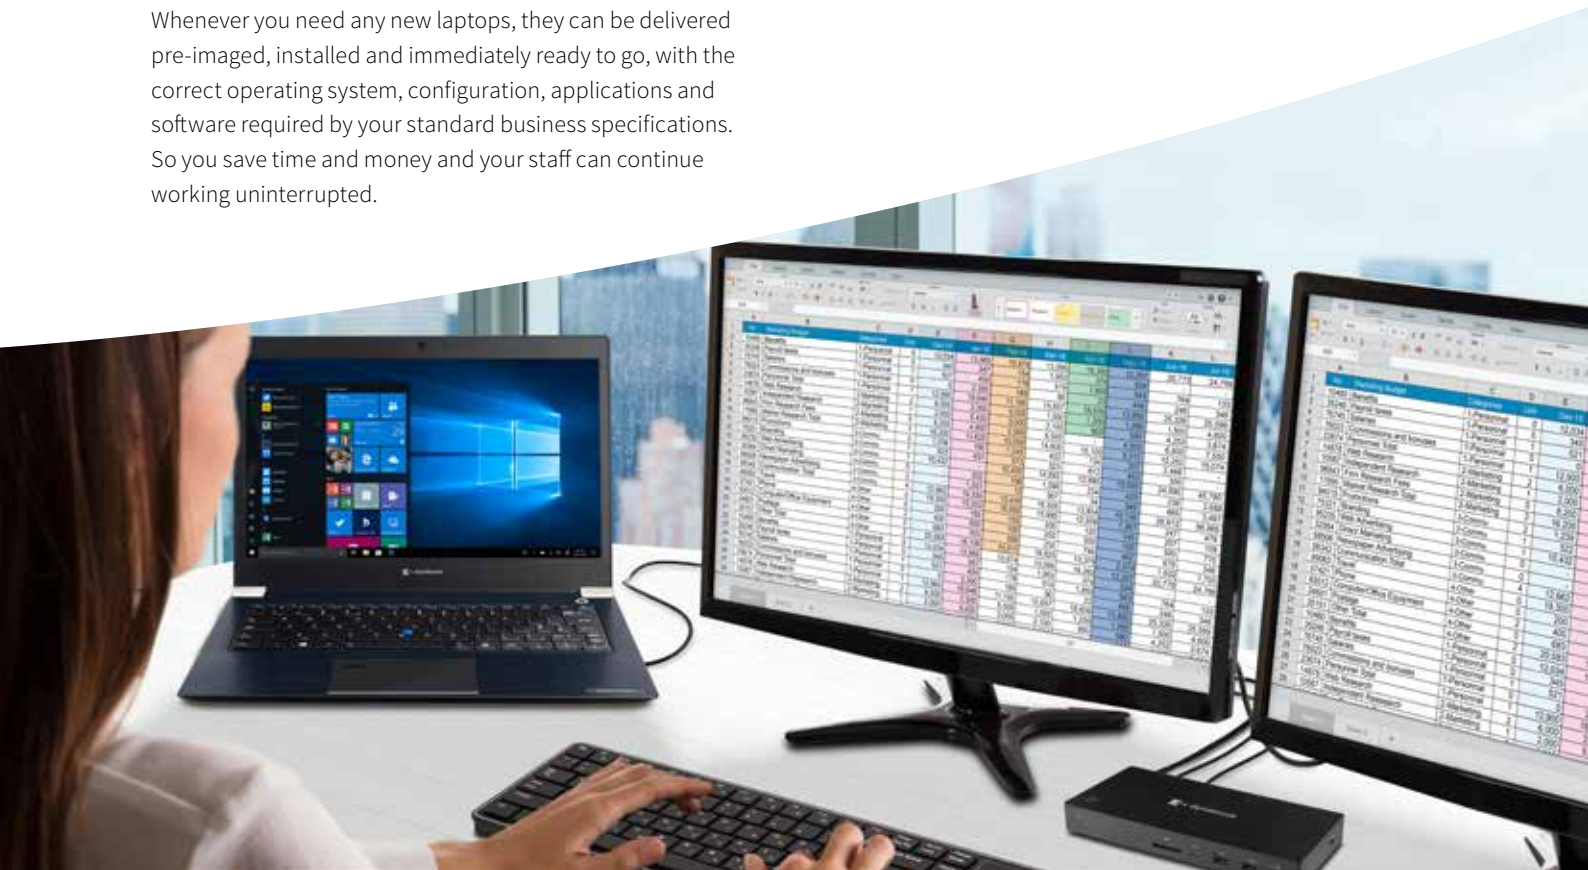

Get the technology you need today – and in the future – and manage your cash flow more effectively with Sharp dynabook PCaaS business laptops. You can enjoy low monthly payments that are tailored to suit your budget. As well as reducing your Total Cost of Ownership (TCO), it also helps you conserve cash to support your wider business requirements.

## Keeping you working

Whenever you need any new laptops, they can be delivered pre-imaged, installed and immediately ready to go, with the correct operating system, configuration, applications and software required by your standard business specifications. So you save time and money and your staff can continue working uninterrupted.

## Safely moving forward

Our service includes an optional end of life recycling solution. It ensures that your old laptops are collected and disposed of securely, minimising any hassle and giving you peace of mind that sensitive business data can't fall into the wrong hands. All equipment is also handled responsibly and in compliance with EU Waste Electrical and Electronic Equipment (WEEE) regulations, so we can recover and reuse precious materials and help protect the environment.

# High-performance solutions and services.

Reliability is a key factor in optimising productivity, so we offer equipment, security and support you can depend on.

## Technology you can trust

dynabook business laptops are the culmination of 30+ years of innovation and dedication to designing, engineering and developing high quality mobile computers for professionals. As well as being capable of supporting a wide range of business and industrial applications they are also designed to ensure optimal security, reliability and manageability:

- **Security** – dynabook is the only manufacturer that creates its own BIOS (Built In Operating System) in-house, so you can maintain ultra-secure access and control. Our laptops all offer secure multi-point login, using passwords, fingerprint and smartcard options.
- **Reliability** – dynabook business laptops are designed to be lightweight, slim and stylish, but also durable. The smart design of premium dynabook laptops means they also have fewer internal parts, which boosts their dependability.
- **Manageability** – When equipping your business with dynabook laptops their common software, power accessory and docking design offers real efficiency advantages. Seamless connectivity, collaboration and control across your business helps to keep employees happy and productive.

## Non-stop threat protection

The risk of cyberattacks and malicious malware are rising relentlessly – with cyber criminals now making ransom demands of up to €1 million<sup>1</sup>. So our PCaaS Managed Critical Security keeps your computers fully protected from viruses and other threats. It takes care of vitally important, but often overlooked or mismanaged, security patching across a wide range of Microsoft and third-party software and includes industry leading, next generation antivirus software, which is continually monitored to ensure maximum protection.

## Proactive problem resolution

Productivity and efficiency are obviously key to business success, so keeping every tool working at its best ensures that processes are performed quickly – and you can look after your clients better. Our proactive performance monitoring constantly checks dynabook key indicators to identify any problems that may need attention before they impact your business or result in costly downtime.

### Find out how you can benefit

If you want an efficient and affordable way to manage the PCs in your organisation please contact us today:

## dynabook PCaaS laptops, a device for every worker

As our most comprehensive and varied range ever, the dynabook business line-up has the ideal device for everyone in your organisation. From ultra-mobile two-in-ones for those who are always on the move, to powerful workstations for desk-based workers, Dynabook work with you to find the right PC for every specialism. But selecting the right PC for each worker doesn't mean a headache in terms of manageability; with common software images, power options and docking across most models, we can make managing your fleet simple and efficient.

### Business ultimate

The best in our range, dynabook X Series models are ultra-light and powerful, with or without touch screen. They are built in magnesium, with an onyx blue and gold finish. All models have USB-C connectivity with power delivery. USB-C docking station (and Thunderbolt 3 on some models) is optional.

### Business advanced

Specially designed for all round productivity the dynabook Tecra series for small and medium businesses presents the perfect balance between quality, performance and price.

### Business essential

Professionals can rely on dynabook Satellite Pro models that bring together the essentials. They are designed with reliability in mind and will be very economical in the long run.

## Welcome to Sharp

Sharp Information Systems Europe (SISE), a division of Sharp Electronics Europe, offers a comprehensive portfolio of award-winning technology solutions to help organisations transform the way they engage with information.

Sharp's service portfolio includes managed IT services that provide businesses with an easy to integrate solution for maintaining a robust IT environment, preventing system outages and protecting against cyber threats. Through our partnership with Foxconn and the integration of Dynabook (formerly Toshiba Client Solutions) we can deliver business laptops, PCs and supporting devices.

Sharp also offers a range of document management solutions, including industry-leading MFPs and high-volume systems, and visual solutions, including the Windows collaboration display with IoT environment sensors for more effective meetings, digital signage solutions and 8K technology for a new standard in image precision.

Our mission is to develop new products that support individual expression; creating life enhancing experiences that let you be original.
