Data Protection

COMPREHENSIVE DATA
RESTORATION & DISASTER
RECOVERY SERVICE

You depend on your data **/This is Why** we make sure you never lose it

It's not a disaster if you can recover /This is Why we make sure you can always keep going

Sharp's Optimised Data Protection service keeps you going even if your entire IT infrastructure is destroyed. Bluntly, it could make the difference between going out of business forever or simply carrying on from where you left off. Here's why.

Think about it. Every time you take an action you add to your digital data store. Contracts, correspondence, email, customer details, payroll, HR, accounts, product knowledge – it's a relentless tide of ever-changing information. What if it all vanished? Or even just some of it?

With an Optimised Data Protection service plan from Sharp you could be up and running again within the hour.

UNPARALLELED PEACE OF MIND

DATA IS KEPT SAFE WHEN DISASTER STRIKES

How we protect you

For a modest monthly fee we'll back up all of your data and store it securely on remote servers in our state-of-the-art data centres. Then we'll update it with regular and frequent incremental backups to keep your business fully protected.

If disaster strikes we can replicate your entire system on our cloud servers, buying you all the time you need to sort out the other problems that come with an unforeseen disaster. But that's not all.

Have you ever deleted a file by mistake? Or have you ever lost an email or suffered a virus? What if one of your file servers has a hard disk failure?

Events like these can happen at any time, with disproportionate consequences for you and your team. What should be a minor inconvenience can rapidly escalate to missed deadlines and hours of lost productivity. But with Sharp you can take it in your stride.

You plan for the future /This is Why we protect you from the unexpected

Even if you have a data backup policy in place you may not be safe. Are you sure that your data is being backed up in the right way at the right time? Is your plan dependent on one person? Have you tested your ability to restore your systems? How much data can you afford to lose?

The stark fact is that without a professional and comprehensive disaster recovery plan your organisation could grind to a halt at any moment. And some businesses never recover.

COST EFFECTIVE BUSINESS PROTECTION

GETS YOU BACK TO BUSINESS - FAST

Take control of your future

Sharp's Optimised Data Protection service protects your data no matter how you store it and regardless of the applications you use. What's more, the service grows in line with your needs so your data will always be safe and always available, no matter what the future holds.

You can't predict the future but you can depend on Sharp.

Benefits at a glance

- Several plans to choose from – pick the one that suits you best.
- Automatically backs up your data and keeps it updated for continual protection.
- Super-fast restoration of accidentally deleted files.
- Superior protection against network and hardware failures.
- Virtual servers accessed through the cloud lets you keep working even after a total disaster.
- Maintains your compliance with data protection legislation.
- Plans can be tailored for statutory compliance and business requirements.

BEST PROTECTION TO ENSURE YOUR DATA IS SAFE & RECOVERABLE

Welcome to Sharp

Sharp has been manufacturing fast, reliable printers and MFPs - and devising new, more productive ways of managing documents - for decades. Many have won awards from respected independent research establishments. All have delivered class-leading performance, often transforming productivity in the workplace.

Sharp is a truly global company with local representation in all major countries. And our expertise now extends far beyond the realm of office printing. Today we address the needs of the whole enterprise, with innovations in professional displays, solar cells, LED lighting and IT services, to name just a few.
